Summary

Frontend Developer with an engineering background, bringing hands-on experience in React, TypeScript, and Next.js. After a deliberate career transition from shipbuilding engineering, I contributed to Guider.Pro — a travel platform for Costa Rica — building an admin panel and features for managing public and private user collections. Eager to join a product-focused team as a Junior Frontend Developer.

Experience

Frontend Developer — Bogoda Digital Pro

Dec 2024 – Present

Costa Rica · Remote

- Built an admin panel with a 4-tier role system (Super Admin, Admin, Manager, User), covering location management and access control.
- Developed public and private collection features, allowing users to create, describe, and manage saved locations with full CRUD functionality.
- Integrated internal REST APIs, handling client-server data exchange and application state management.
- Implemented category-based location filtering (e.g., "Places to Eat", "Adventures", "Services"), improving content discoverability.
- Identified and resolved UI and application logic bugs, improving overall interface stability and user experience consistency.

Python Developer Intern — EcomSeller

Jul 2022 – Sep 2022

Moscow, Russia

- Developed a Python script using Pandas to collect and analyze customer data from an e-commerce platform and load it into a SQL database.
 - Implemented error handling and retry logic with rate-limit awareness, logging failed requests to a file for subsequent reprocessing.
-

Skills

Languages: JavaScript, TypeScript, Python

Frontend: HTML, CSS, React, Next.js

Tools: Git, Webpack, npm

Other: SQL

Education

Netology — Full-Stack Developer Course

Sep 2021 – Jun 2023

Tomsk Polytechnic University — MSc in Mechanical Engineering

Sep 2008 – Jun 2014

Equipment and Technology of Welding Production

Languages

English — B1
